クライアントマニュアル

The screenshot shows the 'Client' window of the Network Control tool, titled 'Client -> 192.168.0.32'. The interface is divided into several sections:

- コマンド (Commands):** Includes buttons for 'CD', 'ドライブ' (Drive), 'バージョン' (Version), 'クリップボード' (Clipboard), 'ファイル' (File), and 'スクリーン' (Screen). The 'CD' button is annotated as 'CDコントロール' (CD Control).
- ドライブ情報 (Drive Information):** A section for selecting a drive, annotated as 'ドライブ情報' (Drive Information).
- スクリーンキャップ (Screen Capture):** A section for capturing the remote screen, annotated as 'スクリーンキャップ' (Screen Capture).
- Windowsバージョン取得 (Windows Version Acquisition):** A section for getting the remote Windows version, annotated as 'Windowsバージョン取得' (Windows Version Acquisition).
- クリップボードテキスト取得 (Clipboard Text Acquisition):** A section for getting clipboard text, annotated as 'クリップボードテキスト取得' (Clipboard Text Acquisition).
- ファイル操作 (File Operations):** Includes 'リスト' (List), '削除' (Delete), and 'コピー' (Copy) buttons. A text input field for file paths is annotated as 'ファイル' (File). An example path 'C:\boot.ini' is provided.
- アプリケーション起動 (Application Execution):** A section for starting applications, annotated as '起動するアプリケーションの名前' (Name of application to start). An example 'notepad.exe' is provided.
- URL入力 (URL Input):** A section for entering URLs, annotated as '起動するURL入力例' (Example of URL to start). An example 'http://www.yahoo.co.jp' is provided.
- ポート指定 (Port Specification):** A section for specifying the port, annotated as 'スキャンするポート' (Port to scan). The value '1888' is entered.
- IPアドレス指定 (IP Address Specification):** A section for specifying the IP address, annotated as 'スキャンする開始IPアドレス' (Starting IP address to scan). The value '192.168.0.1' is entered.
- 接続オプション (Connection Options):** Includes '接続' (Connect) and '切断' (Disconnect) buttons. The IP field is annotated as '接続するサーバのIPアドレス' (IP address of server to connect) and the port field as 'ポート(NCTはTCP 1888番)' (Port (NCT is TCP 1888)).
- メッセージ (Message):** A section for sending messages, annotated as '送信するメッセージ' (Message to send). It includes 'メッセージ' and 'クリーン' (Clean) buttons.
- 結果出力 (Result Output):** A large black area on the left side of the window, annotated as '結果出力' (Result Output).
