action environment )

This software is made by : REALbasic2009r5

Installation method : after defrosting, please preserve it for a proper  
folder.

Ann installation method : every time delete please folder.

--- operative explanation ---

An end method: Select it with a menu or not, Ctrl + Q.

Method of playing

It can be played only if you click a screen. Large disks are white keyboards of a piano.

Small disks are white keyboards of a piano.

A music instrument can select it from screen right upper part.

Higher keys can regulate it in a size of a sound, horizontal bar in a vertical bar.

In case that I use a keyboard, X corresponds to a sound of C.  
Sounds of CDEGHAB are Keys "XCVBNM, etc".

A stair with respect to another is a black keyboard.

For a sound with respect to one octave, Q corresponds to a sound of a high C further.

Higher sounds of CDEGHAB are Keys "QWERTY, etc".

A stair with respect to another is a black keyboard.

You can remove a sound if you push a space by the way. When playing organ for try please.

About this software

Definiteve version of Japanese synthesizer for Mac !

That SHAKU appears on world at last !

The synthesizer made in Japan that a screen shines for seven colors as adding it for a rhythm.

Even shakuhachi according to a name, Koto, and ocarina with a piano and a guitar can be played.

This is the only one solution ! Funky!! Absolutely You have to play it !

P.S. The author doesn't take it responsibly absolutely even though a keyboard of your Mac is out of order by playing it crazily.

(MacOS X 10.5 becomes a recommendation action environment. )
