Application Installer (for Windows 98/ME/2000/XP/Vista/7/8)

1. This is an application installer for Windows 98/ME/2000/XP/Vista/7/8, that was built by modifying the installer (V. 1.0) developed by Mr. Hideo Saito, who is an author of the famous text editor HideMaru."
2. Japanese menu appears for the Japanese OS, and English menu appears for the English OS.
3. You can use this installer for installing your applications.
4. A set of programs, which are required for installing your applications, is as follows;
install.exe
install.inf (**)
your applications to be installed

(**) : When using "English INF file" and "Japanese INF file," substitute two INF files --- installe.inf (for English) and installj.inf (for Japanese) --- for the install.inf.

In the case of the following examples, this set is as follows;

install.exe
install.inf (##)
sample.exe
sample.hlp
sample.dat
readme.txt

(##) : When using "English INF file" and "Japanese INF file," substitute two INF files --- installe.inf (for English) and installj.inf (for Japanese) --- for the install.inf.

5. After getting the above one set of files, it might be better to make a ZIP file (for example) for your distribution.
6. The followings are examples of "install.inf." By referring to the following examples, make an "install.inf" file by yourself.

Example 1:

```
[Install]
Title=Sample Program
Folder=SAMPLE
1=sample.exe
2=sample.hlp
3=sample.dat
4=readme.txt
[Group]
1=Sample Main,sample.exe
2=Sample Help,sample.hlp
```

NOTE:

* For 1=xxx in [Install] section, you should write the main program of your applications,

i.e. executable file-name.

- * Menu, "Sample Program," will appear in the Start Menu.
- * Sub-menus, "Sample Main" and "Sample Help," will appear for the above menu.
- * Default installation directory (i.e. folder) is "C:\SAMPLE."
Do not contain "sub-folder" in the description of Folder=.
(For example, Folder=SAMPLE\ABC is not allowed.)
- * Files to be installed are as follows;
 - sample.exe
 - sample.hlp
 - sample.dat
 - readme.txt
- * Regarding file-name and folder-name, you can use only English characters which are authorized to use for file-name.
- * If you want to attach a "parameter" to the file in [Group] section, please write as follows;
x=Menu-title,File-name,Parameter (where x=1, 2,)

Example 2:

[Install]

Title=Sample Program
Folder=SAMPLE
1=sample.exe
2=sample.hlp
3=sample.dat
4=readme.txt

[Group]

1=Sample Main,sample.exe
2=Sample Help,sample.hlp

[Working Folder]

1=D:\

NOTE:

- * For 1=xxx in [Install] section, you should write the main program of your applications, i.e. executable file-name.
- * Menu, "Sample Program," will appear in the Start Menu.
- * Sub-menus, "Sample Main" and "Sample Help," will appear for the above menu.
- * Default installation directory (i.e. folder) is "C:\SAMPLE."
Do not contain "sub-folder" in the description of Folder=.
(For example, Folder=SAMPLE\ABC is not allowed.)
- * Files to be installed are as follows;
 - sample.exe
 - sample.hlp
 - sample.dat
 - readme.txt
- * Regarding file-name and folder-name, you can use only English characters which are authorized to use for file-name.
- * If you want to attach a "parameter" to the file in [Group] section, please write as follows;
x=Menu-title,File-name,Parameter (where x=1, 2,)
- * Regarding 1=yyy in [Working Folder] section, "yyy" is the "working folder (i.e. Start in)" corresponding to the 1=xxx in [Install] section. In this example, "working folder" of sample.exe is D:\. At [Working Folder] section, only format 1=yyy (e.g. 1=D:\, 1=D:\ABCD, ...) is allowed. But formats 2=yyy, 3=yyy, ... are not allowed. If [Install] section has TSR=1, [Working Folder] section is ignored.

Example 3:

[Install]

Title=Sample Program

Folder=SAMPLE

Open=readme.txt

1=sample.exe

2=sample.hlp

3=sample.dat

4=readme.txt

[Group]

1=Sample Main,sample.exe

2=Sample Help,sample.hlp

NOTE:

- * For 1=xxx in [Install] section, you should write the main program of your applications, i.e. executable file-name.
- * Menu, "Sample Program," will appear in the Start Menu.
- * Sub-menus, "Sample Main" and "Sample Help," will appear for the above menu.
- * Default installation directory (i.e. folder) is "C:\SAMPLE."
Do not contain "sub-folder" in the description of Folder=.
(For example, Folder=SAMPLE\ABC is not allowed.)
- * Files to be installed are as follows;
 - sample.exe
 - sample.hlp
 - sample.dat
 - readme.txt
- * Regarding file-name and folder-name, you can use only English characters which are authorized to use for file-name.
- * If you want to attach a "parameter" to the file in [Group] section, please write as follows;
x=Menu-title,File-name,Parameter (where x=1, 2,)
- * The readme.txt will be opened after the completion of the installation.

Example 4:

[Install]

Title=Sample Program

Folder=SAMPLE

1=sample.exe

2=sample.hlp

3=sample.dat,DATA\sample.dat

4=readme.txt

[Group]

1=Sample Main,sample.exe

2=Sample Help,sample.hlp

NOTE:

- * For 1=xxx in [Install] section, you should write the main program of your applications, i.e. executable file-name.
- * Menu, "Sample Program," will appear in the Start Menu.
- * Sub-menus, "Sample Main" and "Sample Help," will appear for the above menu.
- * Default installation directory (i.e. folder) is "C:\SAMPLE."
Do not contain "sub-folder" in the description of Folder=.
(For example, Folder=SAMPLE\ABC is not allowed.)
- * Files to be installed are as follows;
 - sample.exe
 - sample.hlp
 - sample.dat (#)
 - readme.txt

(#): This file is installed in the sub-directory of the directory (in which "sample.exe" is installed).

For the default assignment, the sub-directory is C:\SAMPLE\DATA.

- * Regarding file-name and folder-name, you can use only English characters which are authorized to use for file-name.
- * If you want to attach a "parameter" to the file in [Group] section, please write as follows;
x=Menu-title,File-name,Parameter (where x=1, 2,)

Example 5:

[Install]

Title=Sample Program

Folder=SAMPLE

1=sample.exe

2=sample.hlp

3=sample.dat

4=readme.txt

[Group]

1=Sample Main,sample.exe

2=Sample Help,sample.hlp

3=Uninstall Sample Program,install.exe,/r

NOTE:

- * For 1=xxx in [Install] section, you should write the main program of your applications, i.e. executable file-name.
- * Menu, "Sample Program," will appear in the Start Menu.
- * Sub-menus, "Sample Main," "Sample Help," and "Uninstall Sample Program," will appear for the above menu.

NOTE: Use "Add/Remove Programs" in the Control Panel for uninstalling your applications, if you do not write "3=Uninstall Sample Program,install.exe,/r."

After deleting the application by using "Add/Remove Programs" in the Control Panel, you can confirm the deletion of the application, if once closing and then again opening the Control Panel.

- * Default installation directory (i.e. folder) is "C:\SAMPLE."
Do not contain "sub-folder" in the description of Folder=.
(For example, Folder=SAMPLE\ABC is not allowed.)
- * Files to be installed are as follows;
sample.exe
sample.hlp
sample.dat
readme.txt
- * Regarding file-name and folder-name, you can use only English characters which are authorized to use for file-name.
- * If you want to attach a "parameter" to the file in [Group] section, please write as follows;
x=Menu-title,File-name,Parameter (where x=1, 2,)
- * Regarding "install.exe,/r," surely use small letters.

Example 6:

[Install]

Title=Sample Program

Folder=SAMPLE

TSR=1

1=sample.exe

2=sample.hlp

3=sample.dat

4=readme.txt

[Group]

1=Sample Main,sample.exe
2=Sample Help,sample.hlp

NOTE:

- * For 1=xxx in [Install] section, you should write the main program of your applications, i.e. executable file-name.
- * Menu, "Sample Program," will appear in the Start Menu.
- * Sub-menus, "Sample Main" and "Sample Help," will appear for the above menu.
- * Default installation directory (i.e. folder) is "C:\SAMPLE."
Do not contain "sub-folder" in the description of Folder=.
(For example, Folder=SAMPLE\ABC is not allowed.)
- * Files to be installed are as follows;
 sample.exe
 sample.hlp
 sample.dat
 readme.txt
- * Regarding file-name and folder-name, you can use only English characters which are authorized to use for file-name.
- * If you want to attach a "parameter" to the file in [Group] section, please write as follows;
 x=Menu-title,File-name,Parameter (where x=1, 2,)
- * If "sample.exe" is a RESIDENT program, you can write "TSR=1" in [Install] section.
Otherwise you should not write "TSR=1" in [Install] section.

Example 7:

```
[Install]
Title=Sample Program
Folder=SAMPLE
1=sample.exe
2=sample.hlp
3=sample.dat
4=readme.txt

[Reg]
1=HKEY_CURRENT_USER\Software\Sample\Sample

[Group]
1=Sample Main,sample.exe
2=Sample Help,sample.hlp
```

NOTE:

- * For 1=xxx in [Install] section, you should write the main program of your applications, i.e. executable file-name.
- * Menu, "Sample Program," will appear in the Start Menu.
- * Sub-menus, "Sample Main" and "Sample Help," will appear for the above menu.
- * Default installation directory (i.e. folder) is "C:\SAMPLE."
Do not contain "sub-folder" in the description of Folder=.
(For example, Folder=SAMPLE\ABC is not allowed.)
- * Files to be installed are as follows;
 sample.exe
 sample.hlp
 sample.dat
 readme.txt
- * Regarding file-name and folder-name, you can use only English characters which are authorized to use for file-name.
- * If you want to attach a "parameter" to the file in [Group] section, please write as follows;
 x=Menu-title,File-name,Parameter (where x=1, 2,)
- * If your application should use "registry," you can write information for the uninstallation of the application in [Reg] section, as follows;

.....

.....

Note : Regarding the above registry-name, you can only use the name which belongs to HKEY_CURRENT_USER, HKEY_CLASSES_ROOT, or HKEY_LOCAL_MACHINE. You should not write [Reg] section, if your application does not use "registry."

It would be better to contain the following message in the README.TXT of your application package for the distribution;

Copyright holder, Kimio Kanda, does not have any responsibility for damage, caused by the use of copyright holder's software, to software of user(s), if it happens.
