

# Icon Viewer

## General View

## Buttons

Sets a color replacing the transparent portion of an icon, for the screen display.

Shows a selection dialog box for a file to be opened, and shows icon(s) in the file.

Shows a preceding page showing icon(s).

Shows a next page showing icon(s).

Saves all icons, that were searched, with names (\*1).

Saves an icon, that has been selected on the current page, with a name (\*2).

Shows About dialog box.

(This file.)

Closes the application.

(\*1): For example, if the number of icons searched is 12 and if an icon filename for saving icons is TEST.ICO, icon filenames to be saved are as follows;

TEST000.ICO, TEST001.ICO, ....., and TEST011.ICO.

In other words, the number from 000 to 999 is automatically added to the assigned icon filename, in sequence.

(\*2): The selection of an icon to be saved is executed by clicking the left button of mouse.

The frame color surrounding the selected icon is changed to red.

## Others:

If an icon searched in EXE/DLL file has a width and/or a height larger than 64 pixels, the icon is ignored for the display.

Only icons displayed on the screen can be saved with filenames.
