Welcome to Hakoniwa Sumo

‘Hakoniwa’ means Miniature garden. You can create your own sumo world. In addition, this game is a product of delusion, and it has nothing to do with real organizations or people. I'm not good at English, so sorry if I confuse you.

1. How to proceed with the game

You can progress the game with ENTER key or ‘forward’ button clicking. All you can do almost is to just look.

2. Overview

708 wrestlers are practicing daily to reach the top of the ranking. However, in this game, training is performed automatically, and abilities also grow automatically.

3. Win or Lost

When you get out of the sumo ring or touch the ground other than sole ,you lose.

4. Ranking

a. You should win

The Ranking is decided based on the results of tournament 6 times a year. And the tournament has 15days. If the number of winning stars exceeds the number of losses, the ranking will generally increase. At least it won't go down. On the other hand, If the number of losses exceeds the number of wins , the ranking will decrease. The bigger you win, the bigger your ranking will go up, and the bigger you lose, the bigger your ranking will go down.

b. SS,S1,S2,S3,A,B,C,D,E,F

The ranking is roughly divided into six. In this game, SS,S1,S2,S3,A is the 1st division, B is the 2nd division, and the lowest is F that is the 6th division.

c. SS and S1 are special

To become S1, you must achieve excellent results at the last three tournament. When it comes to S1, the ranking will not drop unless you lose two consecutive tournaments.

To become an SS, you have to get victory two consecutive tournaments in the position of S1 or obtain a result equivalent to the victory. In addition, not only the last two tournament results, but the tournament before that must also have very good results. Since SS is a special existence similar to God, it remains SS until it retires.

d. Between B and C

There is a big difference in working conditions between B and C. Wrestlers below B serve wrestlers above C.

Wrestlers above C have 15 matches in the 15days tournament . Wrestlers below B have 7 matches in the 15days tournament.

e. Special case

As a special case, some wrestlers debut from C16th or D100th. They achieved excellent results in the amateur age and are expected to play an active role after joining.

5. After retirement

Wrestlers may be able to remain in the association as coaches. To become a coach, you must obtain a deed that represent the right to be a coach. Also you must record excellent result.

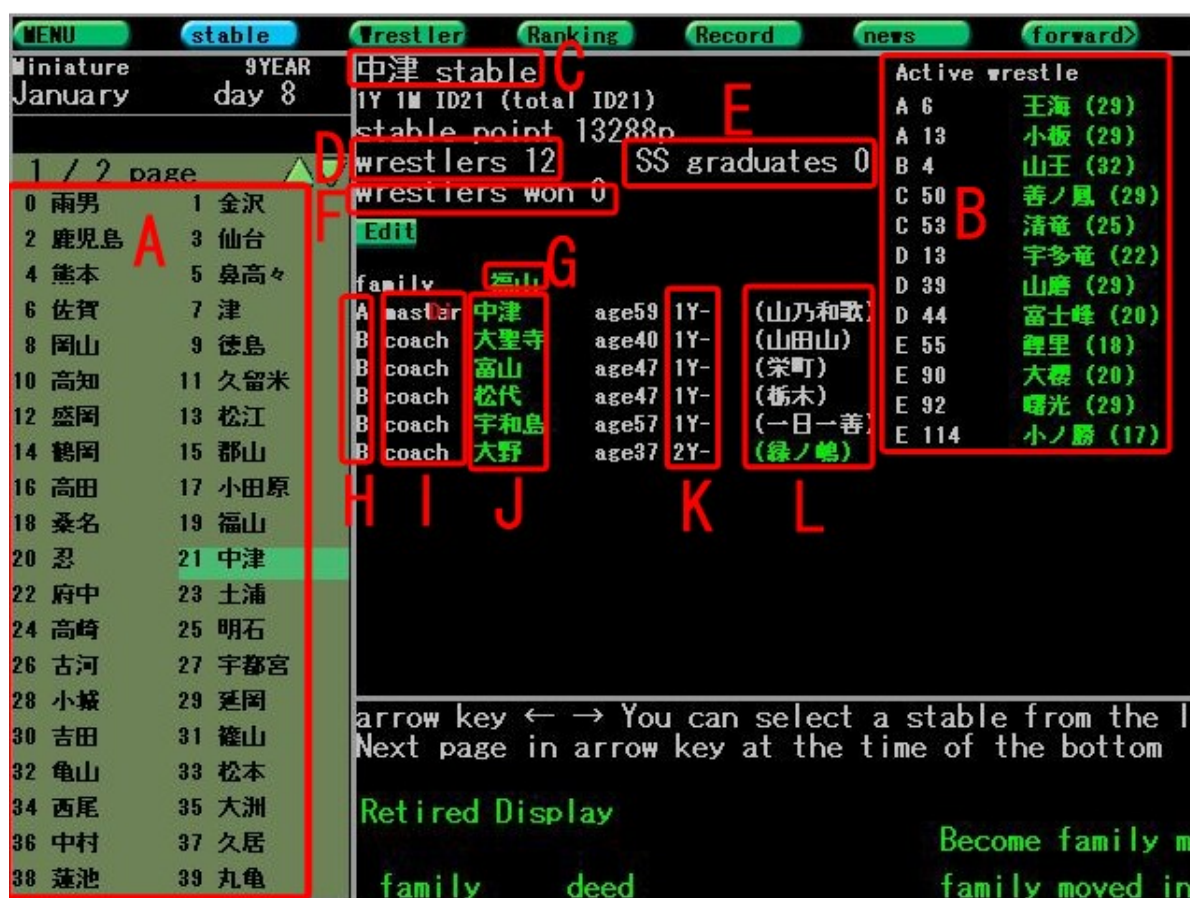

There are only about 100 these deeds. Therefore, in addition to having excellent results, it is not possible to obtain a limited number of deeds without the desire and luck.

Each of these deeds has a historical name. So when you become a coach, you have to change your name to indicate that you are a coach. And you will be aiming for the chairman this time.

Hakoniwa Sumo also keep track of the movement around the deeds.

6. Explanation of various screens

a. stable screen

A: List of stables. Click on the stable show the details.

B: Disciples of the stable

C: Stable's name

D: The number of belonging wrestlers
