

LOOKMR Instruction manual

1. Software Overview

This software is an add-in for use with Microsoft Excel. When you install this add-in, you can search for multiple ranges like VLOOKUP or HLOOKUP with just one expression. You can also easily narrow down the cells you want to retrieve under multiple column or multi-row conditions. It also comes with the function of converting to standard function expressions. For more information on how to use it, please visit:

<https://www.dimkouzo.work/ja/addins/lookmr/>

2. Contact to creator

Destination : DimKouzo

Email address : contact@dimkouzo.work

3. Trial version and Regular version

The software to be installed for both the trial version and the regular version of this add-in is the same. If you do not have a license, you can try it for 7 days by setting it as a trial version. You will not be able to use it after the trial period, but you will not be charged or charged automatically, so please try it with confidence.

4. Operating environment

- OS (32bit/64bit)
Windows Vista / Windows 7 / Windows 8.1 / Windows 10
- Excel (32bit/64bit)
Excel 2013 / Excel 2016 / Excel 2019 / Excel 365

5. Install/Uninstall

Please perform the installation / uninstallation work with Excel closed.

● Installation

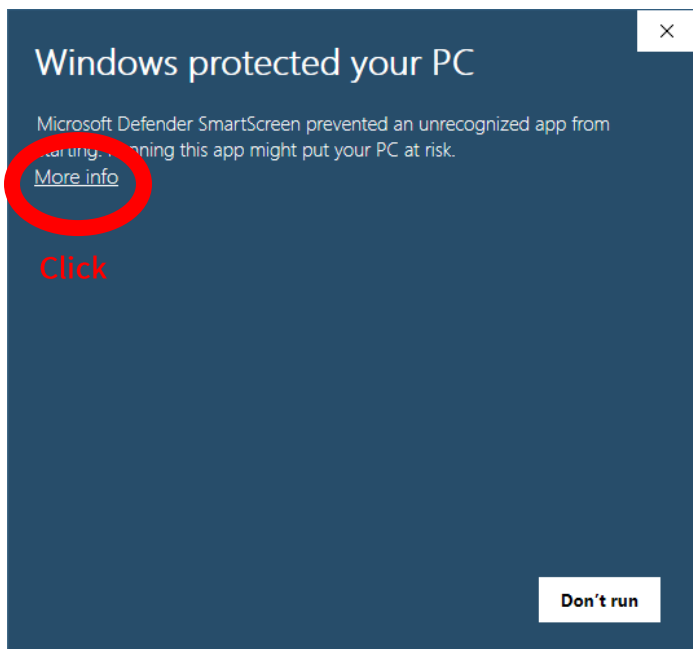

Double-click the LOOKMR_Ver (X.X.X) .exe file included in the compressed file to start the installer. Follow the installer's guide to install.

● Uninstall

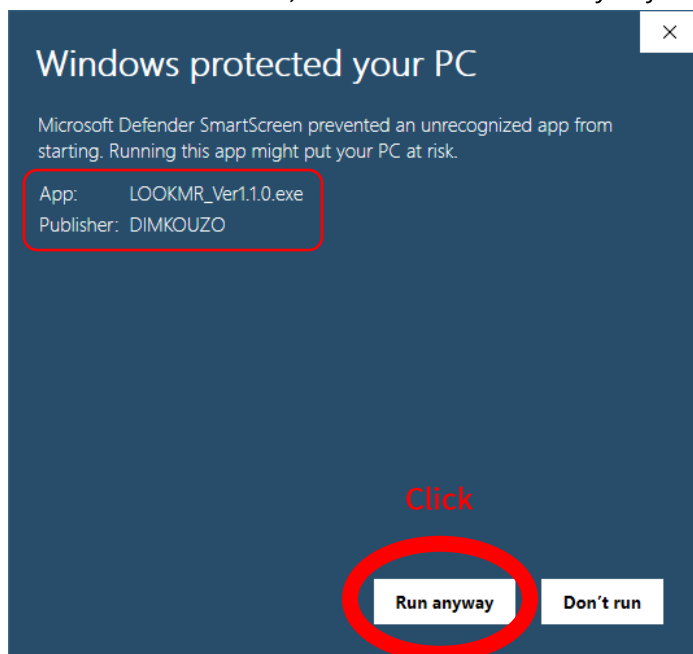

From “Add or Remove Programs” (or “Apps and Features”), find the program name and uninstall it.

- **About support for smart screen**

Although the software is officially signed, you may see a SmartScreen Warning at the beginning of the installation. In that case, sorry to trouble you, but you can start the installer as usual by confirming that the publisher is his Dim Kouzo according to the procedure in the screenshot below and executing it.

If you click the text part of the “More info” in the above figure, the application name and publisher name will be disclosed, and the button “Run anyway” will appear in the lower right.

Click the “Run anyway” button to start the installation. It may take a few minutes for the installer to start, but please wait until the installation screen appears.
