

1 Overview

Describes the contents of the AJATERM download data (AjrTerm.zip).

2 Download data

This package contains all the data shown below.

When you unzip the downloaded "AjrTerm.zip", the following data will be created.

NOTE : The download data (AjrTerm.zip) is created with "Lhaplus".

If you are having trouble decompressing the data, please try "Lhaplus".

3 Install

Double-click the following setup.exe created under "Install / WinXXXX" and follow the on-screen instructions to install.

#	Folder		File	Content
1	Install	Win32J	setup.exe AjrTermSetup32J.msi	Installation data for JP-Windows (32bit)
2		Win64J	setup.exe AjrTermSetup64J.msi	Installation data for JP-Windows (64bit)
3		Win32E	setup.exe AjrTermSetup32E.msi	Installation data for US-Windows (32bit)
4		Win64E	setup.exe AjrTermSetup64E.msi	Installation data for US-Windows (64bit)

If you install "AJATERM", no download data is required. (You can delete everything)

4 Manual execution

You can execute "AJATERM" with the following executable file without installing it.

#	Folder		File	Content	
1	Project	ApBin32	AjrTerm32.exe	AJATERM	For 32bit Windows
2			AjrMacro32.exe	AJATERM-MACRO	
3			Test32.exe	AJATERM test program	
4		ApBin64	AjrTerm64.exe	AJATERM	For 64bit Windows
5			AjrMacro64.exe	AJATERM-MACRO	
6			Test64.exe	AJATERM test program	

5 Document list

List of document files is shown below.

#	Folder		File	Content	
1	Project	DocJ/E	AjrTermJ/E.pdf / .docx	AJATERM	Operating instructions
2			AjmMacroJ/E.pdf / .docx	AJATERM-MACRO	Operating instructions
3			AjmQuickJ/E.pdf / .docx	AJATERM-MACRO	Internal function reference
4			ReadMeJ/E.pdf / .docx	This document	
5			Others	Help display file when executing a program	
18		AjrCstXX	AjrCst32.pdf AjrCst32Old.pdf	Document for Windows Custom Library (Necessary when modifying and rebuilding AJATERM)	

6 Build AJATERM

This package includes the AJATERM source program and build data.

You can modify the source program and customize the program.

You can build AJATERM with the following solution file (.sln).

#	Folder			.sln File	Program to build	
1	Project	App	AjrTerm	AjrTerm.sln	AJATERM	AjrTerm32/64.exe
2			AjrMacro	AjrMacro.sln	AJATERM-MACRO	AjrMacro32/64.exe
			Test	Test.sln	AJATERM test program	Test32/64.exe

NOTE : Visual Studio-2010 or later is required to build the program.

AJATERM uses a custom library for Windows (AjrCst32 / 64.dll).

6.1 List of source programs

List of source programs is shown below.

#	Folder				Source File	Content
1	Project	App	AjrTerm	src	AjrTerm.h	Common definition header
2					AjtAbsPkt.c	Numerical extraction condition setting from packet data
3					AjtAbsTxt.c	Numerical extraction condition setting from text data
4					AjtErrMsg.c	Error message display window control
5					AjtFormula.c	Evaluation of arithmetic expressions
6					AjtMain.c	Main control
7					AjtMkTknArr.c	Arithmetic token array creation
8					AjtRecvXModem.c	File reception by X-MODEM protocol
9					AjtRecvYModem.c	File reception by Y-MODEM protocol
10					AjtSendBinary.c	Binary data transmission
11					AjtSendBinFile.c	Binary file transmission
12					AjtSendTxtFile.c	Text file transmission
13					AjtSendXModem.c	File transmission using X-MODEM protocol
14					AjtSendYModem.c	File transmission using Y-MODEM protocol
15					AjtWnd2dGraphic.c	2D graphic display window
16					AjtWnd3dGraphic.c	3D graphic display window
17					AjtWndTimeChart.c	Time chart display window
18			AjrMacro	src	AjmMain.c	AJATERM-MACRO source program
19			Test	src	Test.c	AJATERM test program
20			GblInc		AjrCommon.h	Interprogram common definition header
21					AjtAddinDef.h	Definition file for addin
22		SampleAddIn	AddIn1	src	AjtAddin1.c	Addin sample DLL

7 Inquiry

For inquiries about this software, please start with "Ajara:" in the subject and contact the following e-mail address in Japanese.

We cannot respond to inquiries other than Japanese.
